- e) 14/4/22 **E Lungdar and Khawbung**: Hlakungpui mual, Lungdar Tlang

Notes:

Let's us begin by saying that we had very crucial period while on tour. By the grace of God, we didn't face any difficulties. Apart from that, the places we've visits gave us a good information about the Identity and the origins of Mizo and the idea of how they migrated into the present Mizoram. It gives us a lot of important information and the ability of understanding the ethnic culture and traditions of Mizo. One came to know that, the value-ness of the visited historical places and imprinted in mind that the authority which is the Government of Mizoram have to take sincere measures for the preservation of those important historical places. We also had 'Cleanliness Drive' during our tour to some places like Lianchhiari Lunglen Tlang and others. Many of those historical places need to handle with care and re-arrange, and also the making a proper road by the authority. Moreover, the people of those villages were very kind and friendly as well as very honest to us, due to that we didn't face any troublesome during and throughout our journey. The tour was very significant and authentic in a matter of the Mizo identity, it gives us an important and crucial information about the ideas of traditions and cultures of early Mizos. One could observe the significant and value-ness of those places situated at different villages and it could be said that it was a very successful study tour and I personally hope that the Government Aizawl West College have the other chances to visit again and also a chance to have another study tour to the other various parts of Mizoram. In contradict to the historically significant, the natural beauty-ness of forest, also the flora and fauna and the strategical location for international trade between the two countries, Burma and India, could became very important for the economic advancement of India and as well as Mizoram State in particular.
